

Lab 03: Critical Proposal

Targetting your Target Paper

October 15, 2024

Overview of Lab 03

Note

The objective of today is to immerse yourself in the 'Research Methods' of your Critical Proposal Target Paper

This may seem like an 'academic' exercise now.. but it is not!

Reading

- Being able to read a single paper carefully and critically is an important skill
- Being able to synthesise multiple papers and appreciate similarities and differences is crucial
- Building on this effort to identify 'gaps' or ways to build on strengths

Today

Note

Think more carefully about each of the following aspects and jot down some ideas for your Critical Proposal:

1. Design of the study
2. Participants and recruitment
3. Materials
4. Procedure

And you will need to identify an Effect Size (again) - why not highlight it now!

Remember

Tip

You can show your Lab Tutor the paper you propose to use for your Critical Proposal... DO SO!

It needs to be a peer-reviewed empirical paper from the Psychology literature that presents a quantitative study, includes methods (Design, Participants, Materials) and analyses the data. Failure to follow these rules will impact your mark.

Submit your chosen paper and information on your current group

This is Compulsory by end of the week.
